

## -20V P-Channel Enhancement Mode MOSFET

### Description

The AP3415AI uses advanced trench It utilizes the latest processing techniques to achieve the high cell density and reduces the on-resistance with high repetitive avalanche rating. These features combine to make this design an extremely efficient and reliable device for use in power switching application and a wide variety of other applications

### General Features

$V_{DS} = -20V, I_D = -4.2A$

$R_{DS(ON)} < 43m\Omega @ V_{GS} = -4.5V$

ESD=3000V HBM

### Application

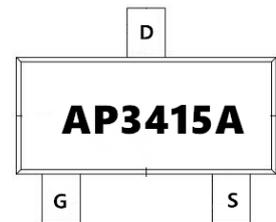

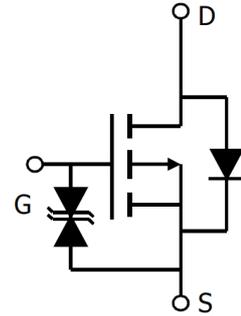

Advanced MOSFET process technology

Special designed for PWM, load switching and general purpose applications

Ultra low on-resistance with low gate charge

Fast switching and reverse body recovery

150°C operating temperature

### Package Marking and Ordering Information

Product ID	Pack	Marking	Qty(PCS)
AP3415AI	SOT-23	AP3415A	3000

### Absolute max Rating: @ $T_A=25^\circ C$ unless otherwise specified

Symbol	Parameter	Max.	Units
$I_D @ TC = 25^\circ C$	Continuous Drain Current, $V_{GS} @ -4.5V$	-4.2 <sup>①</sup>	A
$I_D @ TC = 70^\circ C$	Continuous Drain Current, $V_{GS} @ -4.5V$	-2.4 <sup>①</sup>	
$I_{DM}$	Pulsed Drain Current <sup>②</sup>	-30	
$P_D @ TC = 25^\circ C$	Power Dissipation <sup>③</sup>	1.4	W
$V_{DS}$	Drain-Source Voltage	-20	V
$V_{GS}$	Gate-to-Source Voltage	$\pm 12$	V
$T_J T_{STG}$	Operating Junction and Storage Temperature Range	-55 to +150	$^\circ C$
$R_{\theta JA}$	Junction-to-ambient ( $t \leq 10s$ ) <sup>④</sup>	90	$^\circ C / W$

**Notes:**

- ① Calculated continuous current based on maximum allowable junction temperature.
- ② Repetitive rating; pulse width limited by max. junction temperature.
- ③ The power dissipation PD is based on max. junction temperature, using junction-to-case thermal resistance.
- ④ The value of R<sub>θJA</sub> is measured with the device mounted on 1 in 2 FR-4 board with 2oz. Copper, in a still air environment with T<sub>A</sub> = 25°C

1, Any and all APM Microelectronics products described or contained herein do not have specifications that can handle applications that require extremely high levels of reliability, such as life support systems, aircraft's control systems, or other applications whose failure can be reasonably expected to result in serious physical and/or material damage. Consult with your APM Microelectronics representative nearest you before using any APM Microelectronics products described or contained herein in such applications.

2, APM Microelectronics assumes no responsibility for equipment failures that result from using products at values that exceed, even momentarily, rated values (such as maximum ratings, operating condition ranges, or other parameters) listed in products specifications of any and all APM Microelectronics products described or contained herein.

3, Specifications of any and all APM Microelectronics products described or contained here instipulate the performance, characteristics, and functions of the described products in the independent state, and are not guarantees of the performance, characteristics, and functions of the described products as mounted in the customer's products or equipment. To verify symptoms and states that cannot be evaluated in an independent device, the customer should always evaluate and test devices mounted in the customer's products or equipment.

4, APM Microelectronics Semiconductor CO., LTD. strives to supply high quality high reliability products. However, any and all semiconductor products fail with some probability. It is possible that these probabilistic failures could give rise to accidents or events that could endanger human lives that could give rise to smoke or fire, or that could cause damage to other property. When designing equipment, adopt safety measures so that these kinds of accidents or events cannot occur. Such measures include but are not limited to protective circuits and error prevention circuits for safe design, redundant design, and structural design.

5, In the event that any or all APM Microelectronics products (including technical data, services) described or contained herein are controlled under any of applicable local export control laws and regulations, such products must not be exported without obtaining the export license from the authorities concerned in accordance with the above law.
